Dear Friends:

I am pleased to issue our annual publication, *Dropout Rates in Massachusetts Public Schools: 2000-01*, with information on high school students who dropped out of Massachusetts public schools during the 2000-01 reporting year. The information in this report will be useful in developing and monitoring dropout prevention services.

Summary of Key Findings

- **Annual Dropout Rate** The 2000-01 annual dropout rate was 3.5 percent, remaining the same from the previous year. This rate represents a total of 9,380 students enrolled in grades nine through twelve who dropped out of Massachusetts public schools in the 2000-01 school year and did not return to school by October 1, 2001.
- **Rate Over Time** The annual statewide dropout rate has remained within the range of 3.4 percent to 3.6 percent for the past five years.
- **Distribution of Rates for Individual Schools** The annual dropout rate varied widely among individual schools, ranging from zero percent to 50 percent. More than half of the schools (55 percent) had a dropout rate of 2.5 percent or less. Approximately seven percent of the schools had a rate higher than ten percent.
- **Grade** Students in grade eleven dropped out at the highest rate of 4.0 percent followed by 3.5 percent for tenth graders. A rate of 3.3 percent was calculated for ninth graders, and twelfth graders had a calculated rate of 3.1 percent.
- **Gender** The 2000-01 dropout rate was 4.1 percent for males (approximately equivalent to last year) and 2.8 percent for females (a slightly lower rate than the previous year). Males have consistently dropped out at a higher rate than females for the past several years.
- **Race/Ethnicity** Dropout rates varied widely by race/ethnicity. Hispanic students had the highest annual dropout rate at 8.0 percent followed by a rate of 6.1 percent for African-American students. Each of these rates is relatively consistent with last year's rates of 8.2 percent and 6.1 percent,

respectively. Native American students had a 3.2 percent dropout rate; Asian students, a rate of 3.9 percent; and white students, a rate of 2.6 percent.

- **Vocational-Technical Schools** The annual dropout rate for students enrolled in vocational-technical schools was 3.3 percent, somewhat lower than the statewide rate. The rate for city/town vocational-technical schools was 6.8 percent, an increase from last year's rate of 5.5 percent. The rate for regional, independent and county vocational-technical schools was 2.1 percent, down from 2.6 percent from the prior year.

Thank you for your interest in this report. If you have any questions, please contact:

Introduction

This report provides information on students who dropped out of Massachusetts public schools during the 2000-01 reporting year (July 1, 2000, to June 30, 2001). Dropouts are defined as students in grades nine through twelve who leave school prior to graduation for reasons other than transfer to another school. The Massachusetts Department of Education reports a dropout measure that was developed by the U.S. Department of Education.

According to this measure, students who drop out during a particular reporting year, but return to school by October 1 of the following year, referred to in this report as *returned dropouts*, are not counted as dropouts. The dropout rate is the number of students who drop out over a one-year period, from July 1 to June 30, minus the number of returned dropouts, divided by the October 1 enrollment. This measure will eventually be adopted by all states, allowing for comparisons between states and with the national average.

*A **dropout** is defined as a student in grade nine through twelve who leaves school prior to graduation for reasons other than transfer to another school and does not re-enroll before the following October 1.*

*The **dropout rate** is the number of students who drop out over a one-year period, from July 1 to June 30, minus the number of returned dropouts, divided by the October 1 enrollment.*

Analysis of Dropout Rates

During the 2000-01 reporting year, a total of 9,380 ninth- through twelfth-graders dropped out of Massachusetts public schools and did not return to school by October 1, 2001. These students represented 3.5 percent of the 271,700 students enrolled in grades nine through twelve in the state's public schools on October 1, 2000. The 2000-01 annual dropout rate of 3.5 percent remained the same from the 1999-2000 reporting year.

In addition to the 9,380 dropouts, another 1,598 students dropped out of school during the 2000-01 reporting year and were not in school at the end of the year but returned to school by October 1, 2001. These students, referred to in this report as *returned dropouts*, represented 14.6 percent of the total number of students who dropped out during the 2000-01 school year. The Department does not collect information on students who drop out of school in a reported year but return before the end of the same school year.

Based on the annual dropout rate for each grade level, it is projected that 13 percent of the students who entered ninth grade in the 2000-01 reporting year will have dropped out by the end of their senior year in 2004. This statistic, known as the *projected four-year dropout rate*, is an estimation of the cumulative effect of four years of students dropping out of school for the class of 2004. The projected four-year dropout rate of 13 percent for the class of 2004 is the same as the projected rate for the class of 2003.

The statewide dropout rate masks the wide disparity in individual school rates and the persistently high rates at some schools. Among individual schools the dropout rate ranged from a low of zero percent to a high of 50 percent¹. Sixteen schools reported no dropouts in 2000-01 and another 67 schools reported dropout rates of one percent or less. Twenty-one schools reported dropout rates greater than ten percent. These 21 schools comprised 4.9 percent of the state's grade nine through twelve enrollment, but accounted for 20.7 percent of the state's dropouts.

Table 1. Dropout Rates: 2000-2001					
	Enrollment	Number of Dropouts	Annual Rate	Projected Four-year Rate*	Returns as % of Dropouts**
Total, Grade 9-12	271,700	9,380	3.5%	--	14.6%

Regional/County/Independent	24,787	513	2.1%	8%	12.6%
* Percentage of ninth graders (class of 2004) projected to drop out over a four-year period					
** Percentage of 2000-01 dropouts who returned to school by October 1, 2001					
*** Figures do not include vocational-technical students enrolled in comprehensive high schools					

¹ Because dropout rates for schools with low enrollments are overly sensitive to small variations in the number of dropouts, the analysis of the distribution of dropout rates excludes schools with a grade 9-12 enrollment of fewer than 75 (21 schools in 2000-01).

Table 2. Annual Dropout Rates: 1997-2001

*Excludes schools with enrollments fewer than 75. Percent of schools may not total to 100 percent due to rounding.

Results for Selected Student Populations

Because the dropout rate varies among specific student populations, examining the rate for specific populations is important in developing and targeting dropout prevention efforts. The data collected allow for an analysis by grade level, gender, race/ethnicity, and certain types of schools.

Grade

- Students in grade eleven dropped out at a higher rate than did students in other grades. The 2000-01 dropout rate for eleventh-graders was 4.0 percent, followed by 3.5 percent for tenth-graders, 3.3 percent for ninth graders and 3.1 percent for twelfth-graders. Each grade level has neither consistently decreased nor increased, but instead has fluctuated slightly from year to year.

Figure 1. Dropout Rates by Grade Level, 1997-2001

Gender

- Consistent with previous years, the 2000-01 dropout rate for males, 4.1 percent, was higher than for females, 2.8 percent.
- The dropout rate for males increased slightly from 4.0 percent the prior year. The rate for females decreased slightly from 2.9 percent the previous year.

Race/Ethnicity

- Consistent with previous years, the dropout rates in 2000-01 varied according to race/ethnicity. As in the prior four years, the rate of 8.0 percent for Hispanic students was the highest among the five reported race/ethnicity categories. The annual rate was 6.1 percent for African-American students and 3.2 percent for Native American students.

The rate for Asian students was 3.9 percent and for white students was 2.6 percent.

- The Native American dropout rate showed the largest change of the five reported race/ethnicity categories. The rate decreased for Native American students from 4.2 percent to 3.2 percent. However, the rate for Native American students is susceptible to wide fluctuation due to a low number of Native American students enrolled in Massachusetts schools. The annual rate for Hispanic students decreased from 8.2 percent in 1999-2000 to 8.0 percent in 2000-01. The rate for Asian students decreased from the prior year, from 4.0 to 3.9 percent. The rate for white students and African-American students remained the same from the prior year.
- The projected four-year dropout rate for the Class of 2004 was highest for Hispanic students at 28 percent, followed by African-American students at 22 percent and Asian

students at 15 percent. The rate was 12 percent for Native American students and ten percent for white students.

Vocational-Technical Schools

- In 2000-01, the dropout rate for students enrolled in grades nine through twelve in the state's vocational-technical schools was 3.3 percent – a rate lower than the statewide rate. The annual dropout rate of 6.8 percent for city/town vocational-technical schools was significantly higher than the rate of 2.1 percent for regional, county and independent vocational-technical schools.
- The annual dropout rate for all vocational-technical schools increased slightly from 3.2 percent in 1999-00 to 3.3 percent in 2000-01. The rate for regional vocational-technical schools decreased from 2.6 to 2.1 percent, while the rate for city/town vocational-technical schools increased from 5.5 to 6.8 percent.
- The projected four-year dropout rate for all vocational-technical schools was 13 percent. The projected four-year rate was 24 percent for city/town vocational-technical schools and 8 percent for regional, county and independent vocational-technical schools.

Charter Schools

- During the 2000-01 school year, a total of 5,525 students in grades nine through twelve attended charter schools. Of these, 174 students dropped out, resulting in a dropout rate of 3.1 percent. Of the nineteen charter schools with any of the grades nine through twelve, eight had no dropouts, one had a dropout rate less than one percent, five had a rate of between 1 and 5 percent, two schools were between 5 and 10 percent, and three charter schools had a dropout rate of over ten percent.

Returned Dropouts

Of all students who dropped out during the 2000-01 reporting year, 14.6 percent returned to school by October 1, 2001. These students are referred to as returned dropouts. This percentage is lower than it was the prior year, when 15.4 percent of all dropouts returned to school.

- The percentage of returned dropouts varied by school. Of the 331 schools that had any of the grades nine through twelve and had dropouts during the 2000-01 reporting year, a majority (76 percent) had 20 percent or less of their dropouts re-enroll in school.
- Approximately 27 percent (90 schools) had none of their dropouts return to school by October 1, 2001. Eight schools had all of their dropouts return to school.

Table 5. Returned Dropouts as a Percentage of All Dropouts, 2000-01*

Returned Dropouts	Number of Schools	Percent of Schools
0%	90	27
1-20%	160	48
21-40%	55	17
41-60%	10	3
61-80%	7	2
81-99%	1	<1
100%	8	2

* Table includes only those schools who had dropouts. Percent of schools may not total to 100 percent due to rounding.

The percentage of returned dropouts also varied among specific populations of students. In other words, certain student populations were more likely to return to school than others (see Table 1).

- Grade** In 2000-01, students in grade twelve (15.7 percent) were most likely to return to school, followed by grade eleven (14.7 percent), grade ten (14.6 percent) and grade nine (14.0 percent).
- Gender** Male dropouts were more likely to return to school in 2000-01 than female dropouts were. The percentage of returned dropouts for males, 17.7 percent, is an increase from the previous year, when 15.1 percent of males who dropped out returned to school. The percentage of females who dropped out and returned to school in 2000-01 was 16.7 percent, up from 15.9 percent in 1999-00.
- Race/Ethnicity** Asian students who dropped out were more likely to return to school than students of other racial/ethnic backgrounds. Of the Asian students who dropped out, 20.1 percent returned to school. White students (15.2 percent) were the second most likely to re-enroll, followed by Hispanic students (13.2 percent) and African-American students (12.0 percent). Native American students (11.5 percent) were the least likely to re-enroll. For all race/ethnicity groups, the percentage of dropouts who returned to school decreased from the previous year.
- Vocational-Technical Schools** Students at vocational-technical schools were less likely to return to school than were students statewide. Of the vocational students who dropped out, 13.9 percent returned to school, a significant increase from 9.5 percent the prior year. Students at city or town vocational schools were more likely to return to school than were students at regional, county or independent vocational schools (15.0 vs. 12.6 percent, respectively).
- Charter Schools** Of the 187 students who dropped out of charter schools, 7.0 percent (thirteen students) returned to school by October 1, 2001.

Data Collection and Dropout Rate Calculations

Data Collection

In accordance with the U.S. Department of Education definition, a school dropout in Massachusetts is defined as a student who leaves school prior to graduation for reasons other than transfer to another school and does not return to school by October 1 of the following reporting year. Individual public schools reported to the Department of Education the number of students who dropped out over a 12-month period beginning July 1, 2000, and ending June 30, 2001. Dropout figures were reported in the *Year-End School Indicator Report for 2000-01*. Schools then reported the number of dropouts who returned to school by October 1, 2001. In both of these reports, dropouts were classified by gender within the five racial/ethnic groups across grades six through twelve. Although the Department collects data on students in grades six through eight, the reported rate represents grades nine through twelve. Data on grades six through eight are available from the Department.

Dropout Rate Calculations

Annual Dropout Rate

In Massachusetts, the annual dropout rate is the number of dropouts from grades nine through twelve over a single one-year reporting period, minus the number of those dropouts who returned to school by the following October 1, divided by the October 1 enrollment for that reporting period. Enrollment data for October 1, 2000, collected in the *Individual School Report*, were used to determine the 2000-01 dropout rate. Because students who drop out between July 1 and October 1 are counted as dropouts but are not included in the enrollment figure against which the number of dropouts is compared, the rates may be slightly inflated to the extent to which students drop out prior to October 1.

This is the eighth consecutive year that the Massachusetts Department of Education has reported dropout data using this measure. Prior to 1993, the Department reported a dropout rate that counted all students who dropped out of school regardless of whether they returned to school. This rate, called the *unadjusted dropout rate*, is not included in the analyses of this report. Therefore, data in this report are not comparable to data for the years prior to 1993. Data comparable with earlier years are available from the Department. The unadjusted rate for 2001 is included in the data table of annual dropout rates for schools and districts at the end of this report (Appendix A).

$$\text{Annual Dropout Rate} = \frac{(\text{number of dropouts} - \text{returned dropouts})}{\text{October enrollment}} * 100$$

Example:

$$\begin{aligned} \text{Statewide annual dropout rate (2000-01)} &= \\ (10,978 - 1,598) / 271,700 * 100 &= 3.5\% \end{aligned}$$

Projected Four-Year Dropout Rate

The projected four-year dropout rate is determined by calculating the cumulative effect of four years of dropping out according to the following formula.

$$\text{Projected Four-Year Dropout Rate} = [1 - (1 - W)(1 - X)(1 - Y)(1 - Z)] * 100$$

W	=	Annual Dropout Rate in Grade 9
X	=	Annual Dropout Rate in Grade 10
Y	=	Annual Dropout Rate in Grade 11
Z	=	Annual Dropout Rate in Grade 12

Example:

$$\begin{aligned} \text{Statewide Adjusted Projected Four-Year Dropout Rate (class of 2004)} = \\ [1 - (1 - .033)(1 - .035)(1 - .040)(1 - .031)] * 100 = 13\% \end{aligned}$$

The methodology assumes that (1) current annual dropout rates for grades ten, eleven and twelve will remain constant over the next three years, and (2) students who drop out will not return to school *after* October 1 of the following year. Grade-specific dropout rates for individual schools, as well as projected four-year dropout rates for individual schools, are available from the Massachusetts Department of Education.

Appendix A

Annual Dropout Rates by District and School, 2000-01

District	School	Trend Data - Adjusted Rates (%)				2001			
		1997	1998	1999	2000	Adjusted Rate%	Unadjusted Rate%	Adjusted Dropouts (#)	Total Enrollment

Barnstable	Barnstable High	5.3	1.1	2.7	3.7	2.1	2.5	42	1974
Bedford	Bedford High	0.3	0.0	0.3	1.1	0.6	0.7	4	671
Belchertown	Belchertown High	2.4	3.4	3.4	2.4	3.6	4.0	20	556

Notes: This report includes dropout and enrollment data for grades 9-12. The adjusted dropout rate accounts for dropouts who returned to school by the following October 1; data prior to 1993 did not have this adjustment made and are not comparable to these figures. Some rates are greater than 100 percent because the October 1 enrollment number was lower than the total number of students that dropped out during the course of the year.

Notes: This report includes dropout and enrollment data for grades 9-12. The adjusted dropout rate accounts for dropouts who returned to school by the following October 1; data prior to 1993 did not have this adjustment made and are not comparable to these figures. Some rates are greater than 100 percent because the October 1 enrollment number was lower than the total number of students that dropped out during the course of the year.

Notes: This report includes dropout and enrollment data for grades 9-12. The adjusted dropout rate accounts for dropouts who returned to school by the following October 1; data prior to 1993 did not have this adjustment made and are not comparable to these figures. Some rates are greater than 100 percent because the October 1 enrollment number was lower than the total number of students that dropped out during the course of the year.

Notes: This report includes dropout and enrollment data for grades 9-12. The adjusted dropout rate accounts for dropouts who returned to school by the following October 1; data prior to 1993 did not have this adjustment made and are not comparable to these figures. Some rates are greater than 100 percent because the October 1 enrollment number was lower than the total number of students that dropped out during the course of the year.

District	School	Trend Data - Adjusted Rates (%)					2001

Notes: This report includes dropout and enrollment data for grades 9-12. The adjusted dropout rate accounts for dropouts who returned to school by the following October 1; data prior to 1993 did not have this adjustment made and are not comparable to these figures. Some rates are greater than 100 percent because the October 1 enrollment number was lower than the total number of students that dropped out during the course of the year.

Appendix B

Projected Four-Year Dropout Rates by District, 2000-01

(The projected four-year dropout rate is determined by calculating the cumulative effect of four years of dropping out.)

District	Class of 2000 Rate (%)	Class of 2001 Rate (%)	Class of 2002 Rate (%)	Class of 2003 Rate (%)	Class of 2004 Rate (%)
Abington	12	16	14	6	6
Agawam	9	7	8	3	0
Amesbury	8	8	4	6	16
Andover	2	2	3	3	0
Arlington	7	6	5	5	4
Ashland	0	2	2	2	1
Attleboro	19	17	16	19	28
Auburn	2	3	12	4	9
Avon	5	4	6	10	9
Ayer	2	5	8	14	10
Barnstable	20	5	10	13	8
Bedford	1	0	1	4	2
Belchertown	9	13	13	9	14
Bellingham	7	6	12	6	11
Belmont	3	2	2	3	4
Beverly	20	9	14	21	12
Billerica	5	7	5	8	10
Boston	30	31	34	32	30
Bourne	4	7	7	8	15
Braintree	6	8	5	3	4
